DesignProove Pump Assistant Pro is a portable pump that can be easily connected to a car's cigarette lighter socket using a DC cable. Its small size and weight make it comfortable to hold, easy to transport, and it doesn't take up much space in the car trunk. Features The pump is suitable for inflating tires, balls, and inner tubes, as well as for portable charging of gadgets. With an efficient battery, it can be used with or without a cable, even in places where it is difficult to find a power source. The device operates quietly and continuously for 30 minutes and can be easily recharged in 4.5 hours. Specifications Pump Assistant Pro features a large LED display that shows all the information needed to set the inflation. Additionally, the backlight helps to inflate tires in the dark. The gadget supports 4 types of pressure: PSI, BAR, KPA, kg/cm2, making it easy to adjust to the appropriate device.
