Plastic Welding Staple Set Thanks to the shape of the tips, you can perform surface welding that will join cracks or use them as staples. To do this, immerse the tip across the crack and remove it from the welding forks. After the material cools down, bend the protruding ends so that they break off flush with the surface of the weld. SET CONTENTS Set of 800 staples (200 of each shape) Box with a separator Description of shapes Specification: Brand: LTC Set includes: 800 staples (200 of each type), box with organizer
