Buy now

The new version of the popular Anti Shock cover impresses with its thin, colorful MagSafe ring and even better construction. The transparent case combines rigid back with flexible sides, providing durability, protection, and comfort. Reinforced corners and a raised frame protect the phone from damage, while the inner, textured surface supports heat dissipation. The thin MagSafe ring (1800 Gs) not only stabilizes accessories but also adds style. The case is fully compatible with MagSafe technology, and the cutout for a lanyard increases functionality. The slim design fits into modern trends, and the refined details distinguish the Anti Shock Thin Mag from other products.

## Specification
