**UNIVERSAL ENDOSCOPIC CAMERA** The endoscope on a flexible cable with a 1920x1080p image quality and a large 8 mm lens is a product that will be useful for both home tasks and specialized professional work. The device is very convenient to use. Simply download a free app to your phone and connect the endoscope to your smartphone, and the camera will start transmitting images. You can also connect the endoscope to a computer and observe everything on a large screen.

**RESISTANT TO EXTREME CONDITIONS** The endoscope is equipped with a larger 8 mm lens, which covers the image even more accurately than models with smaller diameter cameras. The device is fully waterproof (IP68), so the camera can be introduced into drains, pipes, air conditioning ducts, or other places with high humidity. Meanwhile, 8 LED lights provide excellent illumination even in the darkest corners. The light intensity can be easily adjusted.

**STIFF CABLE** The stiff-flexible cable allows the endoscope to be bent at any angle. This makes it easy to introduce the camera even into narrow pipes or cables and into high, hard-to-reach places. The camera adapts to the surroundings under pressure from walls and other surfaces.

**FUNCTIONALITY** The device has been designed so that the camera can be used by as many people as possible. The endoscope has a 3-in-1 plug – USB, MicroUSB, USB-C. This allows you to connect the camera to smartphones, tablets, desktop computers, and laptops. Please remember that the product is compatible with Android phones with USB OTG.

**SPECIALIZED TIPS** To facilitate work, special tips have been selected to help in difficult situations, for example, when something valuable falls into an inaccessible place, such as an engagement ring or a house key. The set includes: - Magnet - Hook - Mirror

**PRODUCT ADVANTAGES** - Highest HD image quality - Larger 8 mm lens = better recording quality than 5 mm models - IP68 waterproof - Adjustable LED light intensity - Durable, flexible cable - 70-degree viewing angle - USB adapter included - Ability to connect to a computer - Three additional tips: hook, magnet, mirror

**THE SET INCLUDES** - Endoscope with USB and microUSB plug - USB-C adapter - 3 tips: magnet, mirror, hook - User manual in Polish - Original packaging

**NOTE!** The OTG endoscope works only with devices equipped with USB OTG. The endoscope may not work with some devices running Android 10. Recommended app for operation: - USB Endoscope app Android 10+ (for phones with Android 10) - USB Camera (for others)

The app works only with Android phones that support USB OTG (does not work with iOS/iPhone)

The camera control app is **\*\*Inskam\*\***, available in the Google Play store.
