LXG607

Dedicated power supply for LED lighting made from high-quality components enclosed in a plastic housing, which compact size perfectly fits standard electrical boxes with a diameter of 60mm. An IP67 ingress protection rating ensures protection against water and dust, allowing the power supply to be used both indoors and outdoors. The product is designed to power LED lighting with a voltage of 24V, such as LED strips or integrated fixtures. Currently, LED lighting is one of the most popular ways to illuminate interiors, and due to its versatility, it can serve both as decoration and as basic lighting.

Specification
