UNIVERSAL ENDOSCOPE CAMERA The endoscope on a flexible cable with a resolution of 1920x1080p and a large 8 mm lens is a product suitable for both household tasks and specialized professional work. The device is very user-friendly. Simply download the free app on your phone and connect the endoscope to your smartphone to start transmitting images. You can also connect the endoscope to a computer and observe everything on a large screen. **RESISTANCE TO EXTREME CONDITIONS** The endoscope is equipped with a larger 8 mm lens, which captures images even more accurately than models with a smaller diameter camera. The device is fully waterproof (IP68), making it suitable for introduction into channels, pipes, air conditioning ducts, or other areas with high humidity. 8 LED lights provide excellent illumination even in the darkest corners. The light intensity can be comfortably adjusted. **STIFF FLEXIBLE CABLE** The stiff-flexible cable allows bending the endoscope at any angle. This makes it easy to insert the camera even into narrow pipes or conduits and into hard-to-reach places. The camera adapts to its surroundings under pressure from walls and other elements. **FUNCTIONALITY** The device is designed so that anyone can use the camera. The endoscope has a 3-in-1 connector - USB, MicroUSB, USB-C, allowing it to be connected to smartphones, tablets, desktop computers, and laptops. Please note that the product is compatible with Android phones that support USB OTG. **SPECIAL TASK TIPS** To facilitate work, special tips have been selected to assist in difficult situations, such as when something valuable falls into hard-to-reach areas, like an engagement ring or a house key. The set includes: - Magnet - Hook - Mirror **PRODUCT ADVANTAGES** Highest HD image quality- Larger 8 mm lens = better recording quality than 5 mm models - Waterproof IP68 - Adjustable LED light intensity- Durable, flexible cable - 70-degree viewing angle - Included USB adapter- Ability to connect to a computer - Three additional tips: hook, magnet, mirror **THE SET INCLUDES** Endoscope with USB and MicroUSB connectors USB-C adapter- 3 tips: magnet, mirror, hook - Instruction manual in Polish- Original packaging **NOTE!** The OTG endoscope only works with devices equipped with USB OTG. The endoscope does not work with some devices running Android 10. Recommended app: USB Endoscope app Android 10+ (for phones with Android 10) and USB Camera (for others).
