ELEGANCE IN THE KITCHEN The device features an elegant design that perfectly complements any kitchen decor. Its modern aesthetics, sleek lines, and high-quality materials make it not only a functional tool but also a stylish addition to the kitchen interior. Whether the kitchen is designed in a modern, classic, or minimalist style, this toaster will fit in perfectly. The carefully designed details and compact dimensions allow for easy storage of the device, both on the counter and in a cabinet. The elegant appearance of the device goes hand in hand with its practicality, making it an indispensable element of any kitchen, adding not only functionality but also charm and style.

FULL TEMPERATURE CONTROL Thanks to the advanced heat distribution system, the device guarantees optimal toasting of all types of bread. This technology ensures that heat is evenly distributed across the entire surface of the heating plates, eliminating the risk of undercooked or burned parts of the sandwich. The heating plates made from high-quality materials heat up quickly and maintain a constant temperature throughout the toasting process, which is crucial for achieving ideal crispness and even warming of the sandwich ingredients.

FAST HEATING The 2-in-1 sandwich maker and grill feature fast heating, allowing for instant meal preparation. Thanks to the advanced heating technology, the device reaches optimal temperature in a short time, eliminating long waits to start toasting. This functionality is particularly useful in everyday use when time and convenience matter. Fast heating enables meal preparation even when time is short, such as during morning rush or when unexpected guests arrive.

NO STICKING Forget about cleaning problems after each use. Thanks to the special non-stick coating on the heating plates, food residues do not stick to the surface, significantly facilitating the maintenance of the device's cleanliness. Once cooking is finished, simply wipe the heating plates with a damp cloth or sponge to quickly and easily remove any leftovers. This makes the device not only convenient for daily use but also easy to maintain, saving time and effort. Instructions

Specification

Type of product: toasters and toaster ovens
Power supply : 220-240 V
Colour: black
Brand: LTC
Maximum power [W]: 1 000 W
Warranty: 24 month
