Compact fan heater connected directly to the socket, equipped with a number of advanced functionalities. HIGH QUALITY LTC fan heaters are made of high quality materials, which clearly translates into durability and reliability of the devices. The product is characterized by high performance and wide functionality, while maintaining compact dimensions. LTC fan heaters are devices that meet the expectations of the most demanding customers. 2-WAY ADJUSTMENT Device is equipped with 2 operating modes that affect the operating characteristics of the device. The button on the screen allows you to select one of two power modes. Two-stage regulation allows you to reduce power consumption in situations where operation of the device at maximum intensity is not required. BUILT-IN THERMOSTAT The second way to adjust the operating characteristics of the device to the user's needs is the built-in thermostat. A dedicated pair of buttons located on the housing allows you to adjust the temperature of the air coming out of the device. The thermostat combined with the ability to specify the operating mode allows for precise control over the device. LED DISPLAY The upper part of the device housing is occupied by a digital LED display, surrounded by buttons controlling the device. The display collects all information about the operation of the device and provides it in a clear way. Thanks to it, the user is able to read the current operating mode, thermostat temperature and timer settings. TIME PROGRAMMER The fan heater is equipped with a timer that allows you to specify the working time of the device and schedule automatic shutdown. Thanks to this function, the user is able to determine the remaining working time of the device. From now on, you no longer have to worry about whether the device has been turned off, with the WT15 you know it for sure. OSCILLATION MODE The fan heater has an oscillation mode that allows for more effective distribution of heat / cold around the room thanks to variable airflow directions.

Specification

- Type of product: fan heaters
- Working temperature: 18°C up to +45°C
- Dimensions (mm) LxWxH: 19 x 19 x 51 cm
- Backlight: LED
- Power: 2 000 W
- Functions: autotimer
- Set contains: remote control
- Colour: white
- Material: polymer material
- Input voltage: AC 220-240 V, 50 Hz
- Airflow Adjustment: 2-stage (1400 / 2000W)
- Oscillation mode: yes
- Warranty: 12 month
