Cover Etteri Elegant Mag - reinforced grip and 2300 Gs magnetProduct designed for users seeking durability beyond that of standard silicone covers. The Etteri Elegant Mag is distinguished by its use of a synthetic 3D texture, which serves two functions: it improves device grip (anti-slip) and masks typical signs of wear, such as fingerprints and minor scratches. Strong MagSafe standard (2300 Gs)Magnets with enhanced attraction strength have been used. This guarantees stable operation of heavier accessories (wallets, power banks) and secure holding in car mounts, which is a common requirement of automotive customers. Premium finishThe side buttons made of metal (instead of standard rubber) provide a clear click and high resistance to mechanical wear. Profile and interiorThe thickness of the Etteri Elegant Matt cover is 2 mm - it's an optimal balance between construction stiffness and maintaining the slimness of the phone. The interior lined with microfiber protects the device casing from clouding and the phone casing from scratches. Color range Four muted variants (navy, black, brown, orange) with universal sales potential, suitable for both business and lifestyle customers.

Specification
