Fast and reliable Modern image recording devices, such as drones, sports cameras or video recorders and monitoring cameras have become a common solution in business and everyday life. Their parameters allow you to save more and more high-quality data. The IRDM M2AA card will allow you to take full advantage of the capabilities of your mobile device, video recorder or sports camera. Higher level of mobility The IRDM M2AA card can be successfully used as an extension of the internal memory of Android devices. Use the card freely not only for storing your data, such as photos or music, but also for smooth recording and using mobile applications. These, in themselves, despite their low weight, often consist of hundreds of photos, sound and animations. Therefore, to write and run them properly, a dedicated Flash memory card is required, which, thanks to its computing power, will be able to handle the reading of many processes at the same time. Your data without limits IRDM memory cards are based on the UHS-I interface and U3 speed class to deliver maximum performance in both reading and writing data. The Video V30 speed class provides a constant, minimum write speed of 30 MB / s so you can enjoy the highest quality materials in the 24 / h loop recording mode Lifetime warranty Features of the IRDM memory card are: shock resistance, X-ray resistance, magnetic radiation, and water resistance. Thanks to the highest quality, carefully selected components will prove themselves in extreme conditions. All IRDM by GOODRAM series memory cards are covered by a lifetime warranty as proof of the diligence that the Polish manufacturer puts in their production.

Especificación

Marca: Goodram	Color: negro
Clase de tarjeta de memoria: UHS-I	Velocidad mínima de lectura: 30 MB/s
Capacidad de memoria: 256 GB	Garantía: vitalicio
