FLS-04

Forever Light Sunari FLS-10 solar lamp with PIR motion sensor, which has many functions and features that allow you to effectively illuminate various places, including front doors, sheds, gardens, balconies, facades, etc. The lamp has a high brightness of 600lm and high power of 8W, which allows it to provide good visibility and illuminate a larger area. Its IP65 rating makes it resistant to moisture and dust, allowing it to be placed outdoors. In addition, the lamp is equipped with a PIR motion sensor, which means that the light will be automatically turned on when motion is detected nearby, which is very convenient and saves energy. The lamp also has a capacious 2400mAh lithium-ion battery, which allows it to operate for 8-10 hours, depending on the battery charge. The lamp has three modes, which can be adjusted with the remote control. The first mode is 100% light from motion detection, the second mode is 100% light from motion detection + constant backlight 10%, and the third mode is constant light 50%. This allows you to adjust the brightness and mode of the lamp to suit your individual needs. In addition, the lamp consists of three separate lamps that can be directed in different directions, allowing you to illuminate a larger space. The solar panel is a separate module, connected to the lamp by a 5-meter cable, which allows you to place the lamp in a dark place and the panel in a sunnier one. The lamp has a modern and elegant design and is easy to install. It is ideal for those looking for functional and economical outdoor lighting.

Especificación

Marca: Forever Light	Color: negro
Temperatura cromática: 6000K	Consumo de energía: 8 W
Número de lúmenes: 600 lm	Número de diodos: 108 uds.
Tipo de diodo: SMD	Duración máxima de funcionamiento: 6 hr.
Tiempo de carga: 8 hr.	Tipo del panel solar: Laminado 5,5V 280mA
Número de programas: 3 uds.	Dimensiones del producto (mm) largo x ancho x alto: 275 x 75 x 84 (lampa/lamp), 143 x 86 x 65 (panel solar/solar panel)
Dimensiones del paquete (mm) largo x ancho x alto: 190 x 130 x 104	Tipo de embalaje: caja
Peso neto: 505 g	Peso bruto (incluido el embalaje): 590 g
Material: ABS	Clase de protección (IP): IP65
Alimentación: 2400mAh Li-Ion	Garantía: 12 mc
