UV lamp is recommended by GIS (Chief Sanitary Inspector) as one of the ways to fight coronavirus - ultraviolet light destroys its thin lipid layer. lamp can be used for decontamination of living rooms, offices, cars, kindergarten and school rooms. UV radiation is also used to disinfect smartphones, laptops, cosmetic and medical equipment and other items of everyday use. The lamp effectively removes: bacteria, viruses, microorganisms, fungi, mold, formaldehyde, dust mites, parasites and odors. Remember to use the lamp in accordance with the requirements specified on the device! Do not look directly at the UV lamp or expose your skin to it. People and animals should leave the room before switching on the device. Also remove any plants. After use, ventilate the room for about 20-30 minutes. Ozone is an aseptic and toxic gas as well as a thermally unstable gas, which will be removed after airing and waiting.

Especificación

Consumo de energía: 36 W
