

SINGLE LENS PROTECTION

The protective glass, with a hardness of 9H and an aluminum frame, guarantees reliable protection against drops and scratches. Its easy installation, thanks to the precisely fitted frame, makes securing the lens simple and quick. Just apply the frame to the camera, gently press it down, and remove.

Thanks to its unique decoration, this product not only offers excellent protection but also serves as a distinctive, elegant ornament, accentuating the user's style.

Glass does not limit the ability to shoot in daylight, ensuring excellent results. Its wide compatibility with most cases available on the market is an additional advantage, facilitating everyday use. The glass ensures safety and excellent photo quality.
