Maxlife english learning device MXLD-100 pink

OEM0200498
5900495097385

An interactive, electronic card reader for learning English is an excellent way to spark children's curiosity about the world and their desire to learn English. The toy not only provides entertainment but also educates by integrating learning with play, which is a very effective learning method, especially for younger children. Through this form of play, the child develops memory and concentration and also supports logical thinking and creativity. The toy is simple and intuitive.
