LXG533

High-quality universal car charger designed for self-installation. A very compact unit equipped with 2 ports, USB-A and Type-C, each 2.4A, with a total current of 4.8A. The presence of two ports allows for charging two devices simultaneously, e.g., GPS navigation and a mobile phone. The charger's input voltage is 12V or 24V, making it suitable for use in cars, motorcycles, delivery trucks, heavy-duty vehicles, and even boats. Robust construction, aesthetic design, and the highest quality materials used in production ensure that the product has a long, trouble-free lifespan. A reasonable quality-to-price ratio complements the whole. All these features make this product capable of satisfying even the most demanding users, guaranteeing them satisfaction and safety in use.

Spécification
