The U.G.L.Y. line is our flagship collection of Ugly Rubber models, designed with maximum protection and unique style in mind. Each model in the series is equipped with innovative Dimple Air Cushion technology, providing unparalleled protection and comfort. The first model, named U, combines classic design with a minimalist look. Its subtle details give it an elegant style while ensuring essential protection. Key features of the U model: Extreme Protection: Thanks to double layers of polycarbonate and thermoplastic polyurethane, our model effectively absorbs and disperses the force of impacts, reducing the risk of damage. It surpasses SGS standards in drop tests from a height of 3 meters. Excellent Sound: Specially designed sound tubes direct sound waves directly to the user, ensuring clearer and louder audio. Scratch and Aging Resistance: Exceptionally dense PC and TPU materials with a special coating are used to prevent scratches, material deformation, and excessive color changes. Wireless Compatibility: The model is not only durable but also thin enough to enable wireless charging and use of Apple Pay functionality. The U.G.L.Y. line is a combination of functionality and style, designed for users who value not only the protection of their device but also its appearance and performance. Enjoy great design and maximum protection with Ugly Rubber!

Specifikacija
