myPhone Watch LS is a smart watch that allows you to make Bluetooth calls and receive notifications. It has a convenient 1.85-inch touchscreen display. The watch features a sturdy metal construction and IP68 certification, which provides protection from damage and water resistance. It is compatible with both Android and iOS. With a built-in microphone, speaker and Bluetooth calling function, users can use the watch to make and receive calls. A convenient IPS display with a resolution of 240 x 280 pixels makes it easy to use content, receive notifications and navigate the touchscreen smoothly. The myPhone Watch LS also offers many health and activity monitoring features. You can log workouts, calories burned and other exercise-related data thanks to 107 available sports modes. The watch allows you to monitor your heart rate, stress levels, blood pressure, blood oxygen saturation and sleep quality to effectively take care of your health. With a 260 mAh battery, the smartwatch provides up to 10 days of use. The sturdy metal envelope and durable silicone strap ensure protection from damage and long-lasting use. In addition, the watch is waterproof (IP68). The myPhone Watch LS also allows you to control your smartphone with Google Assistant or Siri, allowing you to voice-control your phone's functions, such as information search, alarm clock, appointment scheduling, music player control and more. Additional features of the watch include menstrual cycle monitoring, watching the changes in the stock market, controlling the smartphone's camera, a timer, a stopwatch, an alarm, checking the weather, controlling the order of music tracks, and a phone finder function that makes it easy to find the smartphone when needed.
