Opt for a new style, with a rich interior The Forever Forevigo 2 smartwatch is available in three popular colours - silver, black and rose gold. It has a durable metal case and a convex 1.4-inch display for greater contrast and colour saturation. The display is made of 2.5D tempered glass, which increases scratch resistance. To choose, to colour Depending on your mood and aesthetic preferences, you can choose from a wide range of static and dynamic themes for the smartwatch's dials. You can conveniently select and upload the dials to your watch using the dedicated Forever Smart app. The user interface is designed in a clear and intuitive form. Always where you are You can easily submerge the watch in water or play carefree on the beach. The IP68 technology guarantees that the watch is dustproof and waterproof. Heavy dirt and splashing the product with water are no longer a problem. No matter where you're going, you can measure everything The watch takes pulse measurements throughout the day, with daily, weekly and monthly statistics stored in the app. This allows the user to continuously track and analyse the changes in their heart rate before, during and after each workout. Tailored to your style Each of the available models comes with two types of interchangeable straps. There is a silicone strap that is pleasant to the touch and gentle on the skin, adding a sporty touch, and a metal bracelet with a comfortable magnetic clasp that adds elegance. Check stats, improve results The watch offers measurement of selected sports activities such as walking, running, cycling, climbing, treadmill running or swimming. You can carry out your daily workout and analyse your progress in real time, or after your workout verify your results stored in the app's memory. The small size battery with a capacity of 200 mAh, which takes only 2 hours to charge allows you to use the smartwatch for up to 15 days. This is guaranteed by the new generation Realtek chipset, which consumes less power and ensures the watch runs smoothly and faster.

Specificație
