AKYGA Adapter QI AK-QIR-01A microUSB

AKKADAKYQl000001 5901720132765 AK-QIR-01A

High quality modern QI adapter with microUSB output, created to allow inductive charging for devices not equipped with a QI module from the factory. Thanks to the universal connector is compatible with all smartphones and other devices powered by up to 5V/1A. It will prove useful for, among others, powering modern smartphones with non-removable casing - just plug the adapter to the device and hide it in a case, and its thin design and light weight guarantee comfortable use. Charging of the device takes place via the induction coil, without the use of cables. After placing the device on the induction charger, the battery will start charging. The AK-QIR-01A adapter allows you to adapt your devices to modern charging solutions and gets rid of traditional network chargers and reduces unnecessary wiring. The product is compatible with all inductive chargers.
