BT08LED

The new BT08LED portable loudspeaker from the Blaupunkt brand is a proposition for all those who appreciate perfect sound, high quality workmanship and modern design. The loudspeaker's shape, shaped like a sphere, looks very designer. Multicolor LED lighting, equipped with 11 different lighting modes can be turned on or off using the button on the control panel. Playing music together with light effects allows you to create a club atmosphere. Music can be turned on in many ways: from smartphones or tablets via the audio streaming profile (A2DP) from a laptop using the AUX input from the radio, thanks to the FM tuner with digital PLL synthesis and 99 station memories. By using this function, you do not have to search for frequencies from the beginning each time you turn on the loudspeaker. through a microSD card reader (up to 32 GB), which allows you to play music files in MP3, WMA and WAV formats.
