AK-TB-11

The Akyga® AK-TB-11 AC adapter is a reliable power source. It owes its versatility to the popular 5.5 x 2.1 mm connector and the power supply parameters of 9 V / 1 A. They are often found in many devices used on a daily basis. These include, among others, network equipment such as modems, switches, TCP / IP or GSM gateways. In addition, the adapter has a 1.5 m cable that will allow you to freely install it. What's more, the power supply is equipped with a set of security features that ensures safe and stable operation. This applies to both powered devices and the power supply itself.
