A battery of the Maximus brand offers the highest performance and increased safety. The innovative use of aluminum envelopes in combination with the cell construction has enabled greater capacity. Tests confirm that the battery on average delivers up to 107% of its rated capacity Q10. Maximus also provides higher safety. Continuously monitored operating temperature and voltage levels on individual cells prevent the battery from overheating and, as a result, prevent it from being damaged.

Špecifikácia

Záruka: 12 mc

Kompatibilita

- iPhone 7 Plus
