Charging station in a waterproof case. Designed for motorcycles, connected directly to the battery. The station is attached with a clamp to the handlebars, or to flat surfaces, such as the tank with a special attached tape. On the housing there is a waterproof switch that turns on the power for the station. The device is equipped with a 12V cigarette lighter socket, two 5V USB sockets and a display. The set allows simultaneous charging from both types of sockets, which means that without any obstacles we can simultaneously power the navigation and charge the phone. The whole set is made of high-quality plastic, airtight and weatherproof. The 1.4m cable will allow you to freely install and place the device in the most suitable place for you.

Špecifikácia

Značka:	LTC
Farba:	čierna
Pracovná teplota:	0°C do +40°C
Vstupné napätie:	12 V 230 V
Výstupné napätie:	5 V
Maximálny výkon [W]:	5 W
