PP14BT

The built-in Bluetooth module allows you to quickly pair the phone with the device, allowing you to play your favorite music without any restrictions. At the back of the housing there are slots that allow you to read MP3 files from microSD cards with a capacity of up to 32 GB and any portable USB memory. Thanks to the AUX connector, the user can also connect any audio source on which he has saved his favorite songs. The device is also equipped with an FM tuner with the possibility of programming up to 60 favorite radio stations. Built-in battery with a capacity of 1800 mAh, when fully charged via the microUSB connector (power supply included) allows for 6 hours of wireless listening, depending on the volume set. The telescopic antenna will ensure proper reception of the radio signal, and the output power of 2 x 3 W RMS will ensure loud sound. The remote control completes the comfort of operation.
